📍 Navi Mumbai

ABOUT ME

A focused Full Stack Developer with 2 years+ of industry experience working primarily with .NET Core and Angular. Passionate about evolving technologies such as Java, MongoDB, SQL, and AI. Skilled in delivering scalable solutions across full-stack development, API design, system integrations, and performance optimizations in cloud-native environments.

WORK EXPERIENCE

GEP Solutions, Navi Mumbai - Software Engineer

June 2023 - Till Date

- Designed and implemented complex logic for the Audit Delta Calculations Service, a critical backend service ensuring 100% accuracy in delta computations and improving processing efficiency.
- Developed Audit webpages using Angular with a low-code, plugin-based architecture, enabling rapid customization and scalability; currently used by 400+ customers worldwide.
- Delivered the Audit AI Agent, integrating LLM capabilities into the audit ecosystem to drive automation and intelligent insights, reducing manual analysis time by 30-35 minutes per document.
- Integrated Logstash into audit delta workflows, reducing Kafka lag by 60%, and improving speed.
- Integrated AI into UI APIs to generate runtime descriptions for exported audit data based on selected filters, enabling users to preview expected file content without downloads, reducing unnecessary database calls and avoiding unnecessary file downloads by 40%.
- Provided cross-functional development support in the Data Disposal Team by creating reusable generic Angular components for low code applications, enabling seamless UI integration, faster development, and consistency across 20+ teams.
- Built a Microsoft Teams app from scratch, leading a proof of concept with AI-powered multifunction utilities, which reduced task switching overhead and showcased next-gen collaboration features.
- Implemented a Blue-Green Deployment strategy, enabling zero-downtime releases, faster rollbacks, and improved reliability during production deployments.
- Developed WCAG-compliant UI components, improving accessibility and inclusivity while meeting global accessibility standards.
- Developed an ADB Notebook for legacy data migration, improving migration efficiency by 70%.
- Implemented Kafka streaming pipelines and integrated New Relic monitoring, leveraging MongoDB, Blob Storage, and unit testing to improve system reliability and reduce mean time to resolution (MTTR).
- Collaborated with cross-functional teams and engaged with stakeholders to deliver new features and resolve critical bugs, while mentoring juniors and ensuring high availability, scalability and reliable platform performance with zero major incidents.

INTERNSHIP

Software Engineering Intern | Deserve Services | May 2019 – Jun 2019

- Worked on Java and Web Technologies to design and develop an Airline Reservation System, enhancing understanding of full stack application development.

IoT Research Intern | Vidyalkar Institute of Technology | Jun 2021 – Sep 2021

- Built an IoT-based Driver Drowsiness Detection System to prevent road accidents using sensor-based monitoring.

SKILLS

- Programming & Frameworks: .NET, .NET Core, C#, Java, C, C++, Angular, TypeScript, JavaScript, HTML5, CSS3, MVC, REST APIs, API Development, Microservices, ASP.NET, ASP.NET Core
- Databases & Storage: MongoDB, SQL, Azure Blob Storage, Azure Databricks
- Cloud & DevOps: Logstash, Microsoft Azure, Cloud Services, CI/CD Pipelines, GitHub, Docker, Kubernetes, New Relic
- Testing & Quality: Unit Testing, Test Automation, SonarCloud
- Methodologies & Tools: Agile, Scrum, SDLC, Jira
- Other Expertise: AI Integration (LLM, AI-powered APIs), Algorithm Design, System Design

EDUCATION

Bachelor of Engineering in Information Technology, 2023 | Vidyalkar Institute of Technology, Mumbai | **8.89 CGPA**

Diploma in Information Technology, 2020 | Padmashree Dr. D. Y. Patil School of Polytechnic, Navi Mumbai | **94.56%**
